GREENSBORO SCIENCE CENTER
AQUARIUM·MUSEUM·ZOO

THE GREAT PUMPKIN SMASH 'N' BASH COMPOST CRUSH

WHEN: Saturday, November 1st, 10am - Noon

WHERE: Greensboro Science Center, lower parking lot by Country Park

WHAT: Join the AP Physics students from Andrews High School as they use their specially designed Pumpkin Chucker Trebuchet to launch your post-Halloween pumpkins! Bring carved or plain pumpkins* for a number of fun pumpkin-smashing contests.

WHY: All the pumpkins will be turned into worm food! The worms will produce rich, organic compost to be used here at the Science Center. Karen Neill from the Cooperative Extension will have a table and demonstrations on bin composting and composting with worms. GSC is proud to support STEM in our local schools while reinforcing the fun of science. Plus, watching pumpkins go splat is really awesome!
